

THE BEAUTY OF WOOD POWERFULLY PROTECTED

CUTEK® is a high-performance exterior wood care system designed as a two-step prepare and protect process. It delivers powerful protection while enhancing wood's natural beauty.

Our prepare products are formulated to clean, strip, or restore exterior wood to its original state. The self-healing protective oil stays active inside the wood to drive out moisture and minimize warping, cupping, and splitting, with an optional transparent UV color to maintain or alter the wood color.
